Million Tedla

Alexandria, VA | milldsc284@gmail.com | 732-659-0757

SKILLS

ML & Data Science: Python, Scikit-learn, TensorFlow, PyTorch, Machine Learning, Regression Analysis, Clustering, Data Modeling

Data Engineering: SQL, SSIS, ETL, Hadoop, Spark, AWS, DataWeave, XML

Data & BI Tools: Power BI, Tableau, SSRS, SSAS, SPSS, MATLAB, SAS, Stata

Databases: MS SQL Server, MySQL, PostgreSQL, MongoDB, Redis, CouchDB

Languages & Technologies: R, Java, C, C++, PHP, CSS, MuleSoft, Anypoint Platform

EXPERIENCE

Volunteer Data Scientist / Machine Learning Engineer May 2026 – Present

APERION AI, LLC

- Designed and maintained scalable data pipelines to collect, process, and transform data from multiple sources.
- Developed ETL workflows using Python and SQL to prepare high-quality datasets for machine learning applications.
- Performed exploratory data analysis (EDA) and feature engineering to improve model performance.
- Built, trained, evaluated, and optimized machine learning models using Python, Scikit-learn, TensorFlow, and PyTorch.
- Automated data preprocessing, model training, and deployment workflows to improve pipeline efficiency.
- Monitored data pipelines and machine learning models, troubleshooting performance and data quality issues.
- Applied data governance, security, and model lifecycle management best practices; used Git for version control and technical documentation.
- Created dashboards and visualizations using Power BI, Tableau, and Python libraries to communicate model insights.

MuleSoft Developer July 2022 – August 2024

Salaam Technologies

- Designed, developed, and implemented Mule 4 integrations using Anypoint Studio, API Manager, Runtime Manager, and Anypoint Exchange.
- Built RAML/OpenAPI-based REST and SOAP APIs, ensuring adherence to enterprise standards and MuleSoft best practices.
- Performed data transformation using DataWeave and XML technologies.
- Worked with HTTP, File, SFTP, and Database connectors to support integration workflows.
- Managed build and deployment processes using Maven in Agile/SCRUM environments.

MSBI / SQL Server Developer February 2020 – July 2022

GEICO *Chevy Chase, MD*

- Developed ETL processes using SSIS and SQL Server to support data migration and warehousing initiatives.
- Created stored procedures, triggers, views, and functions using T-SQL.
- Built Star Schema and Snowflake Schema data models for enterprise reporting.
- Developed and published automated reports and dashboards using SSRS and Power BI, pulling data from multiple sources.
- Scheduled automated reports and maintained reporting systems in collaboration with Agile teams.

PROJECTS

Data Visualization & Analytics Projects

- Developed dashboards and reports using Power BI and Tableau.
- Performed data analysis and predictive modeling using Python and R.
- Completed machine learning and statistical analysis projects as part of graduate coursework.

CERTIFICATIONS

- MuleSoft Certified Developer (MCD) - Level 1 (Mule 4)
- Microsoft Power BI Certification

EDUCATION

Eastern University St. Davids, PA

Master of Science in Data Science. *Expected November 2026*

Relevant Coursework: Machine Learning, Statistical Modeling, Big Data Analytics, Data Science

Addis Ababa University Ethiopia

Bachelor of Science in Economics. *July 2015*
